Island

County YOUTH AND PHYSICAL HEALTH

Washington State Healthy Youth Survey Facts

- More than 200,000 students participate across the state, representing all 39 counties
- Questions ask about risk for injury, health outcomes, alcohol, and drug use.
- Results are used by communities to support youth and reduce risks.

→ = Question was not asked to these students

We are extremely appreciative for the participation of all our Island County School Districts in the Healthy Youth Survey. Their participation allows us to report on the current health status of our youth and track trends over time.

PARENTS

PARENTS CAN ENCOURAGE HEALTHY CHOICES AT HOME:

Use the **5-2-1-0** approach daily:

- 5 or more fruits and vegetables.
- 2 hours or less of recreational screen time.
- 1 hour or more of physical activity.
- 0 sugary drinks. Drink more water and low-fat milk.¹

PARENTS CAN TALK TO YOUR KIDS ABOUT SEXUAL HEALTH:

Teens who talk with their parents about sex, relationships, birth control and pregnancy:

- Begin to have sex at later age.
- Use condoms and birth control more often if they do have sex.
- Have better communication with romantic partners.
- Have sex less often.²

GOVERNMENT

LOCAL OFFICIALS CAN implement policies that promote health through community planning and development.

- Roadway systems can be planned, built, and managed to encourage alternative transportation modes to the single-occupant vehicle, such as walking, biking, and public transit.
- Open spaces can be linked to non-motorized trails and public transportation.
- Funding can support regional trail development that prioritizes linking multi-modal transportation, schools, urban development, places of employment, and recreational facilities.
- Development of multi-unit affordable housing can be encouraged near major employment opportunities, public services including health care, public transportation, retail providing healthy food options, and open spaces such as parks and trails.
- Home and community gardens within urban and urban growth areas can be encouraged through design and permitting processes. Density of fast food restaurants and convenience stores that serve unhealthy food items can be limited, especially near schools.

SCHOOLS

SCHOOLS CAN

- Start or promote a school breakfast program.
- Move recesses to right before lunch, not after.
- Initiate a Farm to School or School Garden program.
- Collaborate with community organizations like local hospitals or health departments to teach healthy choices in classrooms.
- Implement policies requiring that healthy options are available at school events, sporting events, and classroom activities.
- Restrict purchase of soda and all sugar-sweetened beverages on school property.
